CAREER OBJECTIVE

Motivated and detail-oriented IT professional pursuing a BSc (Hons) in Computer Networking and IT Security, with hands-on experience providing technical support during a Sky Broadband internship. Possesses a solid foundation in networking fundamentals, IT troubleshooting, and secure system practices, alongside practical software development experience from building and deploying full-stack web applications. Seeking to contribute to a forward-thinking organization by applying technical skills in network support, security monitoring, and problem resolution, while continuing to build expertise in cybersecurity and network defense.

EDUCATIONAL BACKGROUND

BSc (Hons) Computer Networking and IT Security

2024 – Present

Islington College
London Metropolitan University
Kathmandu, Nepal

SLC

2023

United College
National Examination Board (NEB)
Lalitpur, Nepal

WORK EXPERIENCE

IT Support Intern — Sky Broadband

Feb 2026 – Apr 2026 (3 Months)

- Provided first-line technical support to customers, troubleshooting internet connectivity, router/modem configuration, and network performance issues.
- Assisted with installation and configuration of customer premises equipment (CPE), including routers and modems.
- Diagnosed and resolved hardware and connectivity faults for broadband services, escalating complex issues to senior engineers when required.
- Logged and tracked support tickets, maintaining clear documentation of issue resolution steps.
- Communicated technical solutions to non-technical customers in a clear, professional manner.

SKILLS

Technical Skills

- Programming Languages: Java, Python, JavaScript, PHP
- Networking: TCP/IP, Routing & Switching, Firewalls, Network Monitoring
- Security Fundamentals: Vulnerability Assessment, Threat Analysis, Network Security
- Tools & Software: Wireshark, Git, MS Word, MS Excel, Visual Studio Code
- Operating Systems: Windows, Linux

Soft Skills

- Communication & Customer Service
- Teamwork & Cross-functional Coordination
- Time Management & Prioritization
- Problem-Solving & Adaptability

PROJECTS

THEXEVIWI — Full-Stack Web Platform

Technology: Next.js, Node.js

Built and deployed a full-stack web platform end-to-end, covering frontend development, backend architecture, and production hosting on a live custom domain (thexeviwi.com). Gained practical experience in deployment pipelines, server configuration, and production troubleshooting.

Gym Management System (Academic Project)

Technology: Java

Developed a desktop-based application using object-oriented programming principles to manage gym members, memberships, and records.

Shop Item Management System (Academic Project)

Language/Technology: Python

Built a command-line-based shop item management system that allows users to add, update, delete, and view inventory items with persistent data storage using text files. Implemented features such as search functionality by product ID or name, low-stock alerts, and automatic invoice generation for purchases and restocks. Applied modular programming principles by separating file handling, user interface, and business logic into distinct modules. This project strengthened skills in file I/O operations, data validation, and developing user-friendly menu-driven interfaces for small business applications.

TRAINING & CERTIFICATIONS

- Global Professional Pathway Program (GPPC) Islington College
- Summer Industry Enrichment Program in IS Audit
- Summer Industry Enrichment Program in SIEM for Log Management
